

FROM SUPERFACTORIES TO THE SHOP FLOOR

From building factories of the future,
to visiting 76 shops in 2 months,
to kicking transformation into action.

Daniel Scott Mitchell
CTO & Co-Founder

 **TAKTON.COM**

TODAY'S MFG TECH PLAYBOOK LEAVES 98% OF SHOPS BEHIND.

The “wealth gap” in manufacturing is most present in technology. This gap is **wide and growing**.

Only the top 2% are tech-defined **superfactories**.

Tools from superfactories don't trickle down. They are **too rigid** and **too expensive**.

2%

98%

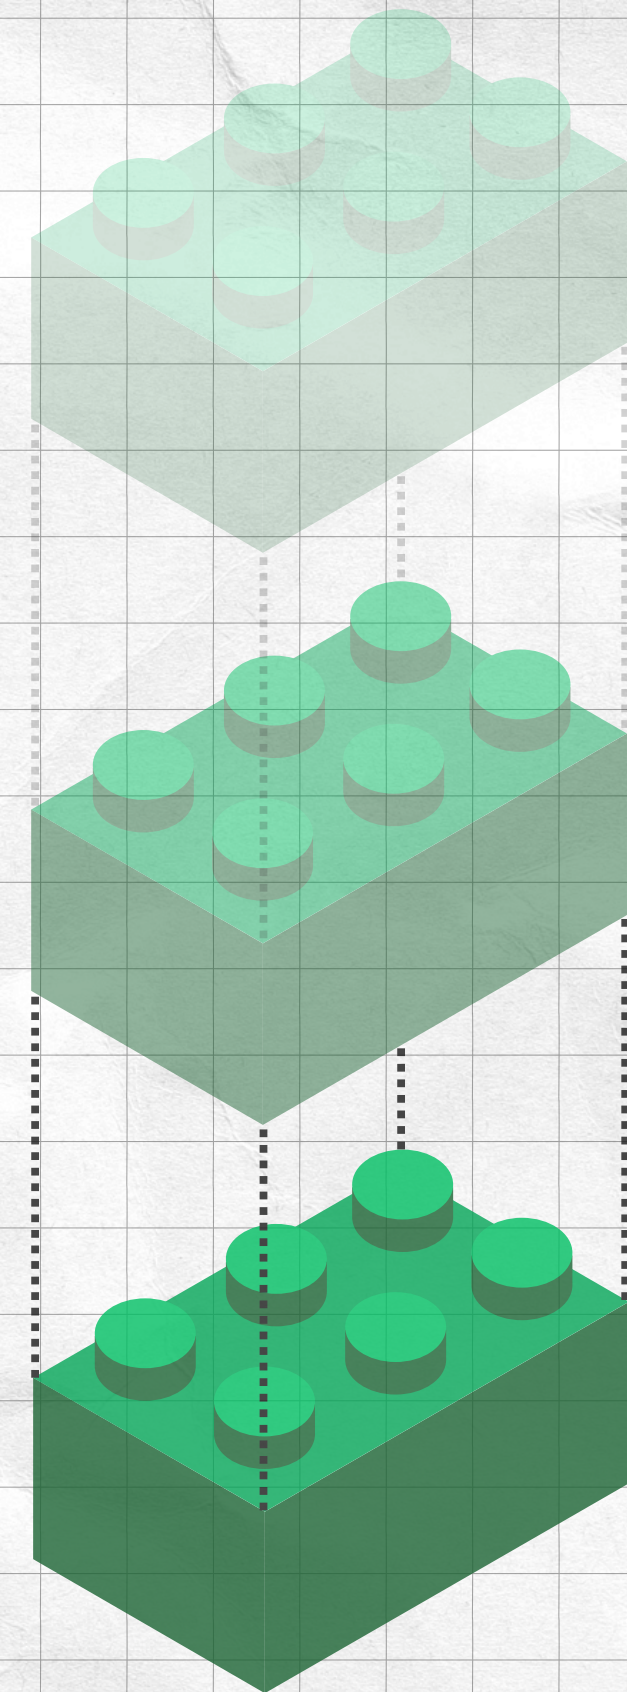

ELITE SHOPS START SMALL, BUT WIN BIG OVER TIME.

Skip “cure-all” solution suites...
Focus on affordable tools with **positive ROI**.

Prove value quickly with small efforts...
Prioritize **building blocks**, not dead ends.

Overlooked building blocks:

- *Digital data capture & reporting*
- *Machine & operator monitoring*
- *Simple dashboards & alerts*

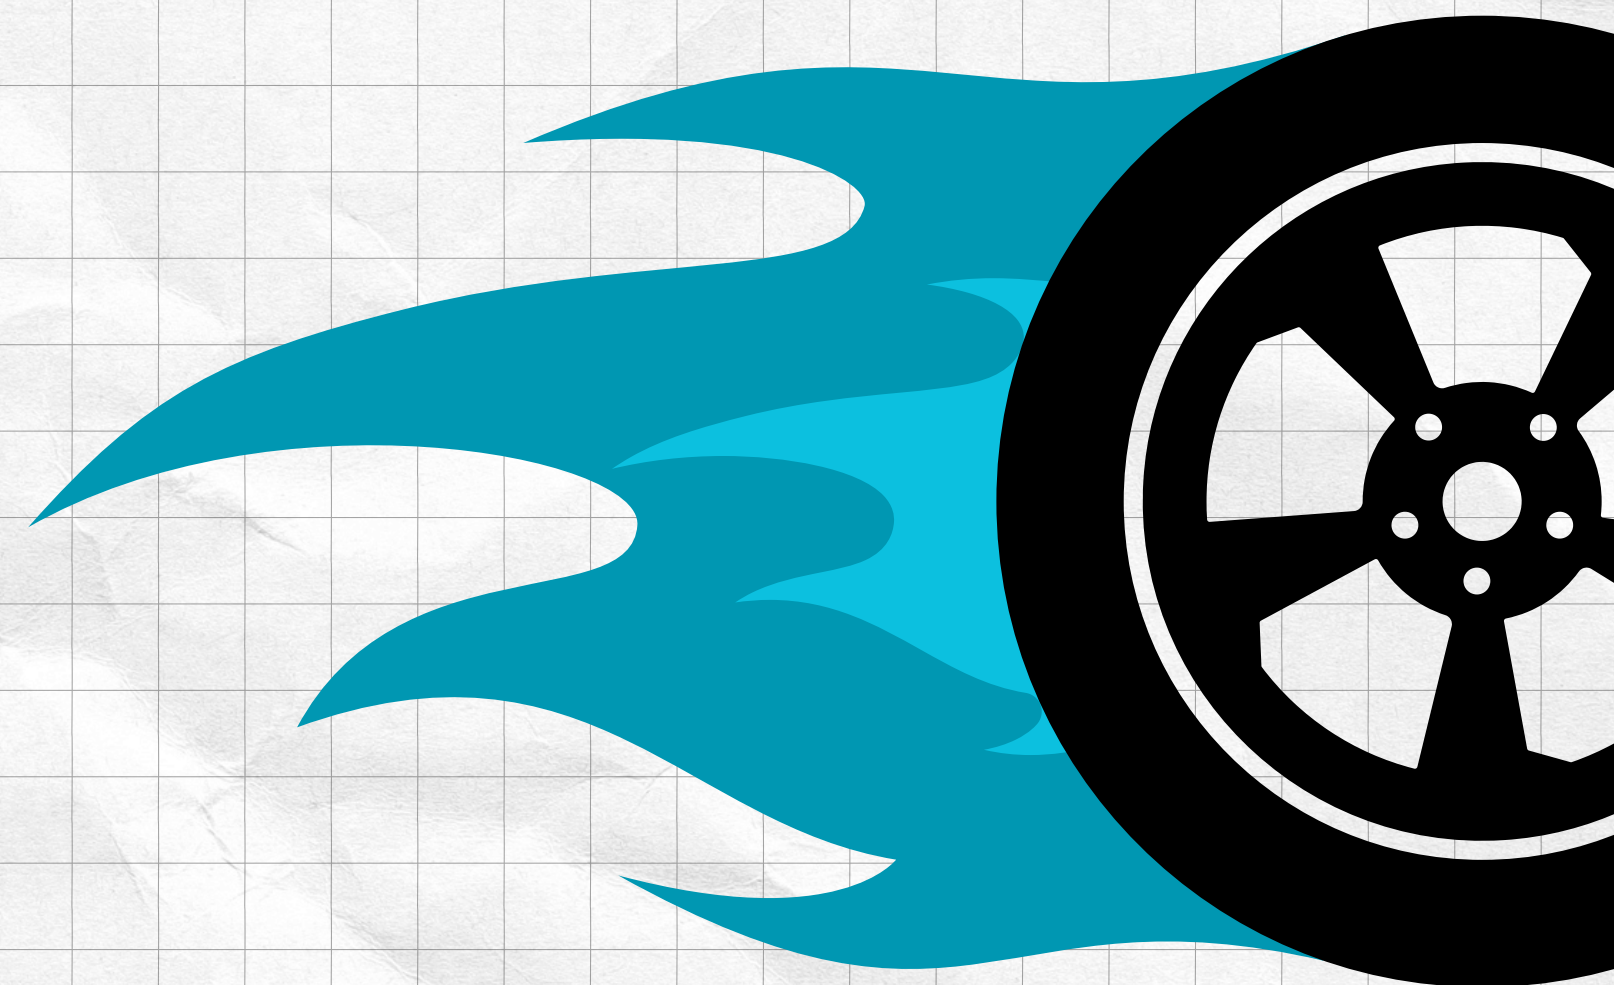

TOP SHOPS TURN TECH INTO A **TEAM WIN.**

Use new implementations as “**rallying points**” for team alignment to overall company goals.

Connect efficiency gains to **higher profits** and **higher pay** for everyone on the team.

No secret “special projects.” Involve the floor early to **keep transparency and trust high.**

LET'S WALK **YOUR SHOP.**

Factory visits are our “secret sauce.”
They help us build the right tools at the right price.

No sales. Just listening and learning.

You'll hear a **fresh perspective** from
superfactories and 70+ shop visits.

Your voice will **shape the next generation** of fast,
affordable manufacturing technology.
